Career Objective

I am a PHP Developer with expertise in Laravel Framework and MVC architecture, focusing primarily on Backend Development. I have strong experience working with MySQL Database and can efficiently integrate RESTful APIs using Laravel.

I also have knowledge of SEO (On-page, Off-page, Technical SEO) and possess skills in Frontend Development using HTML, CSS, JavaScript, and Bootstrap.

I am looking for an opportunity where I can enhance my skills in backend development, MVC structure, and scalable application design, while contributing to the company's growth.

Technical Skills

Languages & Backend:	Frontend:	Tools & Version Control:	API Integration:
PHP, Laravel, Core PHP, MySQL, Node.js (Basic)	HTML, CSS, JavaScript, jQuery, Bootstrap	Git, GitHub	Laravel APIs, RESTful APIs

SEO
On-page, Off-page, Technical SEO

Professional Experience

Digital Future Web Solution   02/2024 – present
PHP Developer   JAIPUR, India
Key Responsibilities & **Projects**:

1. bautlr.com 🔗 **& pandbimports** 🔗 **(E-commerce Websites - USA Focused)**
Description: These are **Jewelry E-commerce Websites** primarily targeted at the **USA Market**.
 My Role:
- **Admin Panel Development:** Built the **Admin Panel** using Laravel Framework and MySQL.
- **POS System Development:** Designed and developed the POS system from scratch with barcode/manual product entry, live **billing**, and tax calculation. Real-time total generation and advanced filtering enabled efficient customer checkout.
- **Barcode Management System:** Generated unique barcodes tied to product SKUs using **milon**/barcode. Ensured accurate stock tracking and fast product retrieval through barcode scanning.

- **Product Catalog System:**Created a dynamic PDF catalog generator that displays **product images, names, and prices** — shareable with customers for offline marketing and bulk purchase reference. Automatically updates with newly added products.
- **Frontend Enhancements:** Improved the UI using **HTML, CSS, JavaScript, and Bootstrap**.
- **SEO Optimization:** Worked on **On-page and Technical SEO** to improve Google ranking.

2. Telegram Bot (Unitrade Coin System)
Description: A **Telegram Bot** developed for a **Coin Distribution System**.
My Role:
- **Backend Development:** Designed the complete **Coin Distribution Logic** using **Node.js**.
- **Coin Distribution System:** Implemented a **Multi-level Coin Distribution System** for parent and ancestor users.
- **API Integration:** Developed APIs to connect the bot with the frontend team.

3. Vostro Market's :-(USDT Coin Distribution Project ⊘)
Description: A **USDT Coin Distribution System**, fully developed using the **Laravel Framework**.
 My Role:
- **Backend Development:** Created the **Coin Distribution Logic** using Laravel and MySQL.
- **Frontend Development:** Designed UI using **Laravel Blade Templates, HTML, CSS, JavaScript, and Bootstrap**.

4. Matrimonial Website (Core PHP Project) ⊘
Description: A **Matrimonial Portal** developed using **Core PHP**.
My Role:
- **Backend Development:** Built **User Registration, Profile Management, and Search Filters** using Core PHP and MySQL.
- **Frontend Development:** Created UI using **HTML, CSS, and JavaScript**.

5. E-commerce Website Enhancements
Description: Improved **Backend Performance and Scalability** of multiple e-commerce websites.
My Role:
- **Backend Optimization:** Improved **Query Performance and Database Optimization** using Laravel and MySQL.
- **Security Enhancements:** Strengthened authentication and authorization.
- **New Feature Integration:** Modified cart system, order management, and payment gateways.
